## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 21-39 are allowed.

The following is an examiner's statement of reasons for allowance:

In view of applicant's arguments, filed 1/30/08 and based on applicant's disclosure and the article by Kitzman et al, the examiner agrees diastolic heart failure is not the same as congestive heart failure.

Detecting diastolic heart failure using:

a workload detector or determining a current workload, and  
measuring a magnitude of a pulse pressure in vivo, or a pulse pressure  
measuring unit to measure a signal indicative of the magnitude pulse pressure and  
comparing, or using a comparator to compare, the pulse pressure with a  
reference value that is associated with the workload to indicate a diastolic heart failure  
state as claimed is not shown nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3762

Min et al (US 7,363,077) teach the condition of congestive heart failure may be manifested as an abnormal diastole phase such as diastolic heart failure. There lacks a teaching or suggestion to use a workload in combination with a pulse pressure to determine diastolic heart failure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (571) 272-4952.
